Project Name	AI Powered Customer Support Ticketing System

Problem: Businesses struggle with manual ticket handling, slow responses, poor prioritization, and inconsistent customer support.

Solution: An AI-powered ticketing system that automatically classifies tickets, prioritizes urgency, suggests responses, performs sentiment analysis, routes tickets to the right agents, and provides analytics.

Customer Problem	AI Solution	Benefit
High ticket volume	Automatic categorization	Faster processing
Slow response	AI reply suggestions	Reduced response time
Wrong assignment	Smart routing	Better resolution
No insights	Analytics dashboard	Improved decisions
